

Electrical Wire Length and Recommendations

This document will provide you and your electrician with the amount of wiring you will need from your GFCI box to your new Bullfrog Spa.

1. Measure the distance of **1 (GFCI box to ground)** enter number of feet in **first box** below.
2. Measure distance of **2 (GFCI to spa)** enter number of feet in **second box** below.
3. Add 1 and 2 to get the **length of wire to spa**.
4. On page 2 or 3, find your spa model, decide where the front of the spa will be in your backyard, and determine what chase-way you will use.
5. On page 2, write in **box 1**, your **chase-way length**. In **box 2**, write in the **length of wire** from previous page. Add **box 1** and **box 2** and this will be the **total length of wire needed**.

Distance 1		Distance 2		Length of wire
